User	Signup Header	I can know that I am currently at the sign up page.	Should	2	8	4	Done

Sprint 3 Backlog

As a	I need/want	So that	Tasks	Progress
Scrum Team	To understand the what happens in the backend.	I can implement it in this project.	Learn about databasesReview on PHPReview on MySQL	Done
Admin	To ensure that the user details/data are stored in the database.	I know that it functions properly.	- Test with different login credentials.	Done
Developer	To code the webpages.	The users can store information in the database.	- Implement PHP - Implement MySQL	Done

Acceptance Criteria

Acceptance Criteria					
• Able to successfully store user's information in the database and redirect to					
homepage.					
 Able to login correctly to the user's account and redirect to the homepage. Able to retrieve the past data stored. 					

Definition of Done

- Reviewed by someone
- Completed unit acceptance testing of each of the user story
- Completion of quality assurance tests
- Completion of all documentation related to the user story
- All issues are fixed
- Successful demonstration to the stakeholders

Daily Scrum – Month of August

Week 5:

	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
What did you do yesterday?	Made the To- do list page	- Made the scrum documentation (the pdf) - Review past lessons about MySQL and php -Made the database by implementing php and MySQL	-Fixed what went wrong with the code Edit the code to redirect login and sign up page to the homepage Test and checked if user details are found in the database.	None	None	None	None
What will you do today?	- Made the scrum documentation for sprint 2 (the pdf) - Review past lessons about MySQL and PHP - Made the database by implementing PHP and MySQL	-Fixed what went wrong with the code Edit the code to redirect login and sign up page to the homepage Test and checked if user details are found in the database.	- Made the scrum documentation for sprint 3 Made the videos discussing sprint 2 and sprint 3.	None	None	None	None
Obstacles	None	None	None	None	None	None	None

Sprint Review

- Successfully implemented PHP and MySQL
- User information is successfully stored in the database

Sprint Retrospective

What went well?	What didn't go well?	How did you overcome the obstacles?	What could have done better?
- Understood and implemented PHP and MySQL.	Cannot detect user in the database when added.Coding the PHP and MySQL.	- Asked help from others Review past lessons when coding the PHP and MySQL.	- Better time management
